

Mr Andy Yeung

Director and Head of Technical Services & Sustainability
Hongkong Land Ltd

Mr Andy Yeung is Director and Head of Technical Services & Sustainability of Hongkong Land. He is responsible for Technical Services Management and Sustainability Management for the company. He graduated from the University of Hong Kong with a bachelor degree in engineering and later on obtained a master degree in Environmental Management.

Mr Yeung is a Chartered Engineer with more than 25-years technical services, energy management, sustainability management, and green building management experience through his work in a number of key property companies.

He was the project leader of the “Carbon Smart Building” project under the Climate Change Business Forum (CCBF) and a member of the Scientific Committee of World Sustainable Built Environment Conference 2017.

Mr Yeung recent works in Green Building Management & Sustainability Management include:

1) Green Building Certification -

Mr Yeung has been proactively leading his team for implementation of green building features and incorporation of green building arrangement. He has successfully achieved the highest green building ratings for a number of buildings under his management.

2) Energy Management & Carbon Reduction –

Setting an ambitious carbon reduction target is essential to building energy management and carbon reduction. With his continuous efforts in this area, the buildings under his management is achieving the target of 30% carbon reduction by 2020 compared to 2008 level.

The key initiatives leading to this achievement include:

- Integration of all Building Management Systems and establishment of a Centralized Monitoring Centre with an energy management platform.
- Optimization of operation arrangement and continuous commissioning.
- Major plant / equipment / facility upgrades to more efficient machines or systems.
- Incorporation of green and energy efficient features during major renovation / system upgrade.
