BREEAM, owned by the BRE Trust, is one of the world's leading sustainability assessment method for masterplanning, infrastructure and buildings. It recognises and reflects the value in higher performing assets across the built environment lifecycle, from new construction to in-use and refurbishment.

This training will provide you with basic understanding of BREEAM In-Use ("BIU"), the leading built asset to portfolio-level operation & management assessment scheme covering key real estate ESG factors. BIU assists property investors, owners, managers and occupiers to drive ESG improvements through driving healthier & more efficient operations. The standard can be used to assess all existing commercial type buildings. The soon to-be launched update of BIU will cover multi-family residential assets. Selected case studies in China and Asia will also be shared.
