

Towards Sustainability – Introduction to Sustainable Procurement

(84108)

Sustainable procurement is the process of buying goods, materials and services for a business in a way that meets the needs of the business on a whole-life basis whilst also contributing to society, by generating not only benefits to the business, but also to society, the economy and the environment. Effective resource consumption and production is a key component for sustainable development. As such, environmental or green procurement considerations are an integral part of the sustainable procurement process. This 3-hour course provides the best practice of sustainable procurement in business operations with a straightforward and cost-effective manner. It is also highly relevant to those engaged in supply chain management.

Click [here](#) to download the Application Form. Enrolment deadline is 5 working days before the course commencement date. Late enrolment will be accommodated subject to seat availability.

TUTOR

Maya De Souza BA(Hons), LLM
Senior Manager – Policy Research

Maya has worked for 10 years in environmental policy and sustainability. Prior to joining BEC, Maya worked for the UK's Department for Environment, Food and Rural Affairs leading a number of policy teams, including Soils Policy, Institutional Structures for Flood Risk Management, Greening Government (CSR for the government) and Sustainable Public Procurement, and a short secondment to the Department for Education. She has extensive experience of working with business, the public sector and the wider community in developing environmental policy positions, translating them into practice, and communicating their benefits. Maya's achievements include implementing EU law on green procurement of energy efficient products, developing tools for public procurement of sustainable and healthy food and low emission vehicles, managing a Soil Policy Research programme, putting in place a new framework for management of flood risk, negotiating EU Directives on soil and contaminated land, and developing a UK soil protection strategy. In Hong Kong, Maya led a project on climate change resilience and manages a number of other policy projects.

- Information provided will be kept strictly confidential and will not be sold, reused, rented, loaned, or otherwise disclosed to third party.

About Business Environment Council Limited 商界環保協會有限公司

Business Environment Council Limited 商界環保協會有限公司 (“BEC”) is an independent, charitable membership organisation, established by the business sector in Hong Kong. Since its establishment in 1992, BEC has been at the forefront of promoting environmental excellence by advocating the uptake of clean technologies and practices which reduce waste, conserve resources, prevent pollution and improve corporate environmental and social responsibility. BEC offers sustainable solutions and professional services covering advisory, research, assessment, training and award programs for government, business and the community, thus enabling environmental protection and contributing to the transition to a low carbon economy. For more information in BEC, please visit www.bec.org.hk.

About BEC Institute of Environmental Education

BEC Institute of Environmental Education (“BEC IEE”), a division of BEC, provides a platform for business managers and decision makers, to advance their knowledge and develop the expertise necessary for environmental decision-making. BEC IEE also facilitates professional development by promoting quality environmental education through various environmental education programmes. For further enquiries or assistance, please contact BEC IEE at beciee@bec.org.hk.
