

SEPTEMBER 2024

BEC E-NEWSLETTER

Connecting · Nurturing · Creating for a Sustainable Environment

BEC ANNIVERSARY DINNER 2024

BEC Anniversary Dinner 2024 took place at JW Marriott Hotel Hong Kong on 24 September. Over 350 government officials, BEC Members, and environmental and sustainability leaders joined the banquet to celebrate BEC's work over the past year and look forward to the exciting opportunities ahead. We were delighted to have Miss Diane Wong, Under Secretary for Environment and Ecology, as our Guest of Honour to deliver the keynote speech. It was a remarkable occasion to recognise the enduring support of BEC's members and partners, and to celebrate the network in our sustainability leadership platform expanding to over 300 member organisations.

ReThink HK 2024

BEC was glad to be the exclusive co-organiser of ReThink HK for four consecutive years. The 2024 edition of the event wrapped up with great success on 12-13 September at the Hong Kong Convention and Exhibition Centre.

During the two-day event, BEC hosted a dedicated BEC Business Transformation Theatre, covering topics on “Embracing Circularity for Sustainable Living”. The programme on Day 1 focused on “Business-Policy Nexus for Circularity and Sustainable Living”, exploring the current sustainability challenges in Hong Kong, the latest circular technologies and practical eco-designs for combatting such challenges, as well as ways to strengthen the repair and reuse economy.

Moving on to “Rethinking Communities”, our programme on Day 2 looked to the roles of non-profit organisations, public agencies, residents and SMEs. The emergence of innovative cross-sector collaborations through public-private-people partnerships and the potential of sustainable SME business models were highlighted.

The BEC Pavilion also showcased the latest sustainable technologies and solutions of BEC Members, accelerating sustainable development and contributing to the transition to a net-zero economy. BEC Chairman Mr Kevin O’Brien and CEO Mr Simon Ng visited the booths to express our heartfelt thanks to all supporting BEC Members.

Green Building Initiatives towards Achieving Carbon Neutrality Seminar

Co-organised by BEC, the Hong Kong Green Building Council (“HKGBC”) and BEAM Society Limited (“BSL”), the Green Building Initiatives towards Achieving Carbon Neutrality Seminar held on 28 August was a great success. We were honoured to have Mr David LAM, JP, Under Secretary for Development, The Government of the HKSAR, as our Guest of Honour to join the distinguished speakers and panellists to discuss strategies for promoting green building at the management level. The event brought together invaluable insights and innovative solutions in achieving carbon neutrality.

The seminar highlighted the close relationship between the property and facilities management industry and the construction industry. We look forward to fostering communication and collaboration between sectors, bringing the enthusiasm and momentum to create a green and sustainable future.

BEC Technical Visit - Unveiling Technological Advancements and Sustainable Elements in Cement Production

BEC successfully held its technical visit “Unveiling Technological Advancements and Sustainable Elements in Cement Production” for our members on 30 August. Representatives from Green Island Cement led an eye-opening tour to the state-of-the-art cement plant, where innovation meets environmental responsibility. They also introduced to the group the precision of raw material handling and blending procedures, not to mention the plant's rigorous testing procedures and the Ground Granulated Blast Furnace Slag grinding facility.

As a highlight of the visit, Director Mr KK Choi specially introduced how the raw meal undergoes a series of concurrent heat exchanges in the preheater with the hot exhaust gas from the rotary kiln. The material temperature rises to as high as 1,450°C, at which a semi-product of cement, called “clinker”, is formed. Mr Choi added that it was the first time for visitors to see the inside of the kiln and the low-NOx kiln burner design.

Headline No.1 Environmental Excellence Award

BEC is delighted to have garnered the “No. 1 Environmental Excellence Award” at “Headline No.1 Awards” for the third consecutive year, in recognition of our achievements and contributions in promoting environmental excellence and sustainability in Hong Kong. BEC CEO Mr Simon Ng received the award at the award presentation ceremony on 30 August.

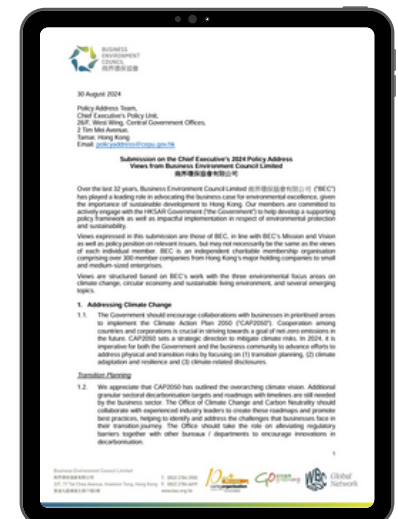

Policy Submission on the Chief Executive’s 2024 Policy Address

BEC submitted our views on environmental policies and Hong Kong’s sustainability plan on 30 August, incorporating our members’ opinions, for the government’s consideration.

The policy recommendations are set out in four categories:

- Addressing Climate Change;
- Sectoral Decarbonisation and Sustainable Living Environment;
- Circular Economy; and
- Biodiversity and Nature.

BEC actively participates in public consultations and submits recommendations to the Government on environment-related topics based on our research and expertise.

Join us now to enjoy member exclusive rights and benefits! We welcome organisations of all sizes across diverse sectors to facilitate environmental sustainability together. For more information about our membership programme, please visit [HERE](#) or contact **Membership Team (T. 2784 3924 | E. membership@bec.org.hk)**.

BEC CEO Dialogue

BEC organised its biannual signature event “BEC CEO Dialogue” on 10 September, focusing on the theme of “Innovation in Real Estate for our Resilient Community and Net-zero Future”. Ms Christina Hau, Chief Executive Officer of Champion Real Estate Investment Trust, was invited as the honourable guest to exchange views with BEC CEO Mr Simon Ng on integrating innovative strategies in the real estate sector to enhance climate resilience of the community, and how pioneering real estate innovations can support the development of a more resilient community and drive progress towards a net-zero future.

BEC IN THE SPOTLIGHT

BEC Opinion Article in EFHK’s *CONNECT*

An opinion article on “Embracing a New Generation of Green Building Standard: Integrating People-Centric Approach with Sustainable Development” was published in *CONNECT*, the quarterly journal of Employers’ Federation of Hong Kong, in late August.

BEC CEO Dialogue Featured in *The Standard*, *AM730*, and *Sky Post*

Our biannual signature event BEC CEO Dialogue held on 10 September was featured in *The Standard*, *AM730*, and *Sky Post* in September.

Interview with BEC CEO Featured in *Headline Daily*

BEC CEO Mr Simon Ng was invited to share about BEC’s initiatives, including Net-zero Carbon Charter and Hong Kong Sustainable Aviation Fuel Coalition, in an interview featured in *Headline Daily* on 13 September.

BEC Opinion Article on *Master Insight*

An opinion article on the latest development and adoption of renewable biofuels written by BEC Assistant Manager – Policy and Research Ms Suki Han and Senior Officer – Policy and Research Ryan Li was published on *Master Insight* on 23 September.

UPCOMING COURSES: BEC IEE TRAINING

The upcoming BEC IEE Training Programme will be announced very soon. Please stay tuned!

ESG CORNER

Practising ESG in Event Organisation

As we reflect on the success of BEC Anniversary Dinner 2024, it is the perfect opportunity to discuss the importance of ESG practices in organising events. In today’s world, where sustainability is at the forefront of many dialogues, integrating ESG principles into event planning is not just a trend, but a necessity.

For environmental considerations, the focus is on minimising the ecological footprint of events. This includes considerations such as waste management, energy consumption, and sourcing materials sustainably.

Implementing a waste management plan is crucial. Some simple ways include encouraging digital invitations, programmes, and menus to reduce paper waste, providing clearly marked recycling bins, partnering with hotels, restaurants, or caterers to minimise food waste and donate leftovers to local charities.

Sustainable sourcing is another good way to practice ESG. A lot of event organisers prefer selecting local vendors and suppliers who prioritise sustainable practices. This not only supports the local economy but also reduces transportation emissions. Using decorations and materials made from recycled or biodegradable products is another good practice.

ESG CORNER

Practising ESG in Event Organisation (Cont'd)

In addition, carbon offsetting has become a common practice today. Event organisers should consider purchasing carbon offsets after calculating the carbon footprint of their events to achieve carbon neutrality. As a leader in environmental excellence promoting net-zero action, BEC is committed to ensuring that all our events are carbon neutral.

The social aspect of ESG pertains to how an event impacts its stakeholders and the community at large. Fostering inclusivity and supporting social causes should be at the heart of event planning.

First of all, event organisers should ensure the events are accessible to all. This includes physical access for individuals with disabilities, as well as considering diverse dietary needs. Providing materials in multiple languages can also enhance inclusivity.

Engaging with the local community by showcasing local artists, musicians, or speakers is also another way to enhance social values of events by strengthening community ties. Additionally, event organisers may consider partnering with local charities or organisations, allowing guests to contribute to a cause that resonates with them.

The governance component of ESG encompasses transparency and accountability. By being transparent about the sustainability efforts and communicating ESG goals and practices to all stakeholders, including attendees, sponsors, and partners, trust and collaboration can be enhanced. Building relationships with vendors and partners who share a strong commitment to ESG principles may involve

conducting due diligence to ensure their practices align with sustainability and ESG values. Gathering post-event feedback regarding ESG practices can also provide valuable insights for future events and demonstrate a commitment to continuous improvement.

Here are some tips for implementing ESG practices in event organisation. If your organisation is new to ESG practices, begin with small changes. This could be as simple as reducing single-use plastics or choosing a local caterer. Please be bold to set clear targets by defining specific, measurable ESG goals for your event. This could include reducing waste by a certain percentage or sourcing a specific amount of local produce. It is also essential to educate your team to ensure that everyone involved in the planning process understands the importance of ESG practices. Providing training or resources to help them implement these principles effectively is critical. Moreover, do not forget to promote your efforts and let others know about them. Do not be shy to use social media and other communication channels to share your ESG initiatives before, during, and after the event by highlighting the positive impact of attendees' participation.

In conclusion, by embracing ESG practices in event planning, we can create gatherings that are not only memorable but also responsible and impactful. As we move forward, let us commit to making sustainability a fundamental aspect of every event we organise, fostering a culture of responsibility and care for our planet and its people. Together, we can lead the way in demonstrating that events can be a force for good.

UPCOMING EVENTS

Technical Seminar: Global and China Outlook of Energy Demand, Supply and Trends towards 2050

18 October

In 2050, the world will be different—vastly different. Reducing emissions to achieve a net-zero future will require supportive policy, technology innovation, and market incentives to drive faster deployment of all available solutions.

BEC are pleased to organise a technical seminar that welcomes Ms Monica Muzny and Mr Vineet Malik, international energy experts from ExxonMobil. They will share their perspectives on the energy demand, supply and trends worldwide and in China through 2050 with BEC members. They will also discuss the various solutions for providing the energy and products the world needs during its transition while reducing greenhouse gas emissions.

Chinachem Group Sustainability Conference 2024

7 November

The highly anticipated **Chinachem Group Sustainability Conference 2024** is now open for registration! Co-organised by **Business Environment Council** and **Hong Kong Green Building Council**, the Conference will explore holistic solutions to tackle the interconnected challenges of climate change, sustainable financing, and impact investment, under the overarching theme of “Integrating Sustainability Solutions towards a Resilient Future”.

Through a dynamic mix of keynotes, panel discussions, and interactive sessions, Chinachem Group Sustainability Conference 2024 will connect the three interrelated themes to equip business leaders, policymakers, investors, environmental experts, academia, and sustainability champions with the knowledge, tools, and collaborative networks to inspire game-changing action and create lasting impact for a climate resilient, socially equitable, and sustainable future.

Building on the success of attracting over 2,600 attendees last year, the upcoming Conference promises to be even more impactful, featuring a distinguished roster of speakers.

- Date: 7 November 2024 (Thursday)
- Time: 9:30am – 5:00pm (Registration starts at 9:00am)
- Venue: Nina Ballroom, 7/F, Nina Hotel Tsuen Wan West, 8 Yeung Uk Rd, Tsuen Wan | Online
- Language: English (with simultaneous interpretation to Cantonese & Mandarin; Cantonese sign-language interpretation)
- Registration Fee: Free of charge (pre-registration required)
- CPD Hours: 5 hours (2.5 hours for each morning and afternoon session)
- Register now:

Policy Dialogue Series

8 November

BEC POLICY DIALOGUE SERIES

The Chief Executive's 2024 Policy Address

08 November 2024 | 9:30a.m. - 11:00a.m.

BEC Auditorium

Following the upcoming Policy Address to be issued on 16 October 2024, BEC will be hosting our Policy Dialogue Series exclusively for members to exchange opinions with the Government. This dialogue session strives to share the Government's latest thoughts and goals related to climate and environment, and allows business to address significant issues and concerns such as sectoral decarbonisation, financing transition, climate-related data disclosure, resilience, and adaptation. By assembling various and diverse viewpoints, we hope to foster an in-depth conversation with the Government on transitioning to a net-zero economy that incorporates the expectations of the business sector.

BEC is pleased to have Miss Diane Wong, Under Secretary for Environment and Ecology, as our guest of honour. Miss Diane Wong will join BEC Members and Board Directors for the discussion on the latest development of environmental related policies and city-wide decarbonisation action plan.

Council Members

The Airport Authority Hong Kong ("AAHK")'s two aviation fuel facilities have obtained International Sustainability and Carbon Certification: Carbon Offsetting and Reduction Scheme for International Aviation ("ISCC CORSIA"). This certifies that the sustainable aviation fuel ("SAF") handled at these facilities complies with ICAO's CORSIA sustainability requirements and enables traceability throughout the SAF supply chain. By providing fuelling infrastructure for SAF, AAHK enables airlines to efficiently receive, store, and utilise pre-blended SAF, significantly contributing to the decarbonisation of airline operations and reducing Scope 3 emissions. AAHK remains committed to promoting SAF uptake in Hong Kong.

CLP Power Hong Kong Limited ("CLP Power") and a major public housing property management service provider in Hong Kong signed a Memorandum of Understanding ("MoU") on 8 August. The MoU aims to strengthen the capability of the partner's property management team in energy management and handling of power incidents, improving the industry's resilience to cope with extreme weather conditions. The partnership will also help the partner enrich its residents' knowledge of energy saving and decarbonisation and promote the use of digital customer services to mitigate the impact of climate change in the long run.

MEMBERS CORNER

Hang Lung Properties has recently unveiled the Grand Hyatt Kunming at Spring City 66. Seamlessly integrating sustainability with Yunnan's natural beauty and cultural legacy, the hotel's contemporary design adheres to LEED™ Gold Pre-Certification, indicating that the building meets world-class standards in terms of carbon reduction and environmental protection. These sustainability goals will also guide all operational practices. Furthermore, to celebrate the region's biodiversity, the rooms playfully feature hints of animals hidden in different corners, as if condensing Yunnan's natural ecology within the space. This exemplifies Hang Lung's dedication to creating compelling spaces that enrich lives.

Henderson Land took part in the Biz-Green Dress Day organised by Hong Kong Green Building Council. Sustainable development is not just a goal – it is fundamental to the company's day-to-day business operations. Henderson Land's employees have flaunted their innovation while advocating for a sustainable lifestyle. Adorning themselves in colourful, eco-conscious attire, its employees reaffirm their dedication to sustainability and ignite inspiration for others to unite in curbing carbon emissions and aiming for carbon neutrality by 2050.

In recognition of its effort and achievement in promoting decarbonisation and assisting Hong Kong to achieve the city's long-term carbon neutrality target, **HK Electric** was granted the prestigious Gold Award in Manufacturing Sector under the BOCHK Corporate Low-Carbon Environmental Leadership Awards 2023. To help combat climate change and achieve the city's carbon emission reduction targets, HK Electric implemented various environmental projects including the commissioning of new gas-fired units, the expansion of solar power systems in company premises and the implementation of retro-commissioning for office buildings.

Swire Properties ranked first in the Hang Seng Corporate Sustainability Index for the seventh consecutive year. The company obtained the Best Overall Score of All Assessed Eligible Stocks in Hong Kong among 550 assessed stocks in the universe of the index and maintained the highest rating of "AAA", which was only awarded to three companies this year. The company also received the highest score in the "Social" aspect across the index and achieved the top score for "Environment" in the real estate sector. Swire Properties is also listed in the Hang Seng ESG 50 Index for the fifth consecutive year, showcasing it as one of Hong Kong's top 50 ESG leaders.

MEMBERS CORNER

Wheelock Properties has joined forces with a non-profit organisation to establish the largest Transitional Housing Project in Tai Po, fostering a caring and inclusive community. Since April this year, residents have been moving in gradually. This project comprises 1,236 residential units and is expected to benefit approximately 10,000 residents over its eight-year lifespan. Wheelock Properties has consistently advocated for sustainable development principles, a commitment that the housing project embodies. This is the first project to reuse existing MiC components and ecological assessments are conducted to minimise environmental impact. Additionally, re-energising the community is another key focus of this project. The community living room, designed and furnished by Wheelock Properties, is now open and hosting a variety of community activities to enhance community interaction.

Ranked as the “#1 Environmental Consulting Firm” by a renowned American engineering media company, **AECOM** returned to this year’s ReThink Sustainable Forum with participation from around 20 specialists across various disciplines and a showcase of over 15 ESG projects across Asia. Six leading industry professionals from AECOM shared insights on creating liveable cities, enhancing mobility, and building nature-positive built environments. AECOM’s booth displayed the latest tools and digital solutions for ESG advisory, along with low-carbon construction materials. This allowed attendees to experience the company’s sustainability expertise firsthand. AECOM aims to deepen engagement and foster collaboration with clients and partners, creating and delivering sustainable legacies for generations to come.

ATAL won the “Sustainable Organisation – Gold Award” at the UNSDG Achievement Awards Hong Kong 2024, which recognises organisations that align their business practices and sustainable operations with the United Nations Sustainable Development Goals. ATAL is dedicated to developing innovative construction technologies to assure quality, safety and efficiency, while investing in artificial intelligence, Digital Twin and robotic solutions as well as environmental technologies for climate solutions, clean water and waste treatment to meet customer needs and create value for the community.

In September, **HAECO** became the first company to conduct an electric ground power unit (“eGPU”) trial at the Hong Kong International Airport, setting a new milestone in the company’s sustainable development goals. Among the wide range of vehicles used in its operations, eGPUs are crucial in supporting maintenance services as they supply stable electricity to an aircraft. In the latest try-out on an Airbus A350, the eGPU facilitated a successful deep clean service by providing stable electricity output. During the six-month trial project, the eGPU is expected to contribute a carbon reduction of 78.9% compared to its diesel counterpart. As HAECO continues to move forward with its extensive fleet electrification plan, it is eager to explore new opportunities and be a positive force in driving a sustainable future.

MEMBERS CORNER

Arup has been appointed to lead a joint venture with fellow BEC Member AtkinsRéalis on the investigation consultancy works of Lau Fau Shan, Tsim Bei Tsui, and Pak Nai Areas (“LFS”), following its successful delivery of the Land-use Review Study for the same area. LFS is a key component of the High-end Professional Services and Logistics Hub in Northern Metropolis. Arup will adopt its Smart Green Resilient approach, Nature-based Solutions and beyond to empower LFS with greater biodiversity and enhanced connectivity, unlocking its value in becoming a “New Digi Bay” and a future eco-tourism exemplar.

At the “Restaurant, Bar, and Café Hong Kong 2024” exhibition held in September, **Vegware** showcased plant-based disposables as sustainable alternatives to plastic, supporting the F&B sector in complying with plastic ban regulations. Visitors learned how the compostable products can be recycled with food waste and reduce them to landfill. The company also sponsored the Sake Hour and Latte Art Demonstrations by providing high quality and odourless bagasse pots and paper cups. Vegware’s 100% sustainably sourced paper hot cup is ideal for authentic coffee tasting. After use, guests disposed Vegware cups in on-site recycling bins, collected and processed by the company’s waste management partner. This demonstrates that small-scale recycling can result in big impact, contributing to closing the loop and transforming waste into nutrient-rich compost.

AS Watson’s flagship health and beauty brand collaborated with a non-profit organisation to launch the Medicines Disposal Programme in Hong Kong in June. Medicine collection boxes for unused or expired medicines were placed in nearly 60 Watsons pharmacies across all 18 districts of Hong Kong. Over 7.2 million pills were collected, a fourfold increase from last year. More than 600,000 MoneyBack points were distributed to encourage customer participation. The programme prevented chemicals from entering soil or water sources, protecting human health and the environment while raising public awareness about responsible medication waste disposal.

MEMBERS CORNER

As solar panel installations continue to increase and factors such as extreme weather, safety concerns, and technological advancements often lead to premature disposal, solar panels are ending up in landfills and polluting the sea at an alarming accelerating rate. With this concern in mind, **Circular Economy (Hong Kong) Limited** teams up with a regional association to develop a circular solar waste management platform that connects solar supply chain stakeholders with an initiative to boost the circular economy by providing cost savings and opportunities for resource recovery and achieve low carbon emissions targets.

Cundall recently hosted a “Navigating Hospitality’s Journey to Net Zero” round table discussion, bringing together industry experts from Asia-Pacific and the Middle East to explore strategies for embedding sustainability into luxury experiences. The conversation enjoyed by global guests highlighted critical drivers for emissions reduction and operational improvements in the hotel and hospitality industry, emphasising the need to align with national net-zero goals and addressing the growing demand from travellers for eco-friendly practices in hospitality. Cundall looks forward to the opportunities to collaborate with its clients and stakeholders to develop comprehensive net-zero pathways and facilitate the sustainability transition.

GF Technovation participated in the Business GOVirtual Expo at HKCEC on 11-12 July, showcasing innovative solutions in waste management, building management, and worksite safety. By leveraging IoT, AI, cloud solutions, radar, and video analytics, the company aims to enhance efficiency, improve safety, and elevate customer experience. Its Assistant Manager, Clement Li, delivered a talk at the conference’s Discover Stage, highlighting how smart waste bins and AI-powered recycling bins revolutionise waste management by embracing technology for greater efficiency, utilising data-driven insights for continuous improvement, and providing real-time monitoring to ensure safety.

Open Lab, a pioneering initiative by **The Hong Kong Research Institute of Textiles and Apparel** and a global foundation, provides agile solutions for the textiles and fashion industry to address climate change. It spans 20,000 square feet in Tseung Kwan O InnoPark and hosts a technological database featuring over 80 sustainable projects by HKRITA. Launched on 4 September, the Open Lab serves as a dynamic hub for industry-wide partnerships. It was honoured with the ITMF International Collaboration Award in the same month. Open Lab welcomes visits and collaborations from the fashion and textiles industry, and enterprises that use fabrics.
