

## **Ms Amie Shuttleworth**

Global Director for Sustainability

Cundall

Ms Amie Shuttleworth is responsible for Cundall's global sustainability strategy spanning their 20 different offices and all of their engineering and consultancy services offered. Since joining she has created a sustainable design training programme available to all employees (Cundall Diploma) which has now had over 100 engineers upskilled on this 2 year programme, developed the Beyond Report – a free sustainable design report provided to all clients to show how that project can embed sustainability, signed Cundall up to achieve Science Based Targets as well as a member of EP100. She recently lead a team in the development of their new sustainability strategy, One Planet, One Chance – which focuses on Research & Technical Development ensuring Cundall's services remain cutting edge. Previous to joining Cundall, Ms Shuttleworth was the Head of Sustainability for main contractor Sir Robert McAlpine in the UK where she worked for over 10 years before returning to Hong Kong where she grew up. During this time, Ms Shuttleworth was recognised as one of Building Magazine's Rising Stars of Sustainability in 2013, she was also a visiting Fellow of Sustainable Construction at Birmingham City University and the Cambridge Institute of Sustainability Leadership Ambassador.
