DINNER

Business Environment Council
ANNIVERSARY 2013

Congratulatory Message from Mr K S Wong, Secretary for the Environment

It is my pleasure to congratulate Business Environment Council (BEC) for achieving another year of success along its sustainability pathway of promoting and advocating environmental excellence in Hong Kong.

Serving Hong Kong for over 20 years, BEC has been instrumental in promoting environmental awareness and advocating environmental best practices in Hong Kong business community. It has also been an important partner of the Hong Kong Government in driving our city towards low-carbon and low-waste economy. I foresee more collaborations and communications between the Government and the business community via BEC in the coming year.

In 2013, the Government launched "A Clean Air Plan for Hong Kong" in March and "Hong Kong Blueprint for Sustainable Use of Resources 2013-2022" in May. These plans request discussions and exchanges with the community and relevant sectors. To a large extent, the success and effectiveness of their execution depends on the understanding, support and cooperation of the whole community. BEC has a key role to play in engaging the business and the larger community in understanding and responding to these plans and measures, as well as providing society with viable options and sectoral contributions.

In recent months, society has responded actively to some of the major environmental issues of Hong Kong, such as the extension of existing landfills, integrated waste management facilities (i.e. modern waste-to-energy incineration technology), and quantity-based municipal solid waste charging scheme. It is encouraging to see cross-sector discussions on environmental issues imminent to the well-being of Hong Kong. I hope that the strong network of BEC will continue to help facilitate discussions and contribute expertise to these issues, so that, hand in hand, we can plan for and take effective actions to pave way for a better environment for Hong Kong.

I take this opportunity to express my heartfelt appreciation for the societal contributions of BEC in the past years in the environmental arena, and wish BEC another vibrant and fruitful year of success.

KS Wong

Message from Chairman

It gives me great pleasure to welcome you to the Business Environment Council (BEC) Anniversary Dinner 2013. Whilst it is the time to review our journey in fostering Hong Kong's environmental sustainability over the last year, it is also an occasion to acknowledge our members and stakeholders' significant contributions to the success in promoting environmental excellence among the business community in Hong Kong.

The past year has been a very exciting one for environmental development in Hong Kong. The HKSAR Government has laid down a few plans and held a few stakeholder engagement workshops to tackle some long-standing environmental issues of Hong Kong, especially with respect to air quality and waste management. BEC prides itself on being able to be involved and contributed in the territory-wide action items under these plans.

BEC, together with Hong Kong Green Building Council, formed the Construction and Demolition (C&D) Waste Joint Working Group to gather views from industry stakeholders and draw consensus for the targets and recommendations on the reduction of C&D waste. Policy recommendations to the Government will be consolidated in the coming months. We are also coordinating BEC Members' views on Hong Kong's environmental policies, and will submit a paper to the Office of the Chief Executive for the Government's consideration in the upcoming Policy Address.

To move Hong Kong towards a low carbon economy, community support and participation, industry involvement and Government's direction are all indispensable. Open dialogues, direct communication and strong collaboration between the Government and the community are keys to the successful implementation of environmental policies and measures. BEC will continue to contribute our ideas to the Government, share our expertise with the community, and provide appropriate communications platforms for the relevant parties. In the coming year, we will continue to gather our ideas and efforts in subjects and issues that are important to environmental sustainability, and of great concern of our Members, to bring about further improvement to the environment of Hong Kong.

I would like to extend my sincere gratitude to BEC Members, partners and the Government for their continuous support to our works in promoting and advocating environmental excellence. We look to further expand our network and exert a greater impact in building a sustainable Hong Kong.

John Chai
Chairman

is our Strongest Motivation

恒基兆業地產集團
HENDERSON LAND GROUP

Henderson Land is committed to excellence not only in business, but also in building a better future for all, for a healthier and more harmonious community. We will continue our efforts in supporting education and sports development, promoting arts and culture and in the education of environmental protection. Because the satisfaction of our customers, our stakeholders, business partners and the well-being of the community at large is our most gratifying reward.

Your smile is our strongest motivation.

Review from Chief Executive Officer

The past year has been another fruitful and productive year for BEC. Apart from attaining a new high in BEC membership with a 20% increase, we have stepped up our efforts in furthering environmental advocacies on different fronts.

Firstly, 4 Advisory Groups were established for our members during the year, namely BEC ESG Advisory Group, BEC Waste Management Advisory Group, BEC Energy Advisory Group, and BEC Climate Change Business Forum Advisory Group. The mandate of these Advisory Groups is to advise BEC Board and members on matters related to these environmental topics, build capacity amongst BEC members and the broader business community, and forge collaborative links between local and global expertise on these topics. Substantive work plans have been developed for the Advisory Groups for the coming 2 years and we look forward to working with the members of these Advisory Groups in advancing environmental sustainability in Hong Kong.

I am encouraged by the increasing participation of members and the community in our initiatives as well as our events. For instance, participation in our flagship event EnviroSeries Conference this year was over 40% higher than last year. BEC Leadership Networking Series, which is a monthly event introduced last September, has seen an increasing trend in monthly participation. Our new division BEC Institute of Environmental Education started to roll out courses on various environmental subjects and delivered tailor-made in-house training for companies during the year. So far, 13 courses have been held with nearly 400 participants.

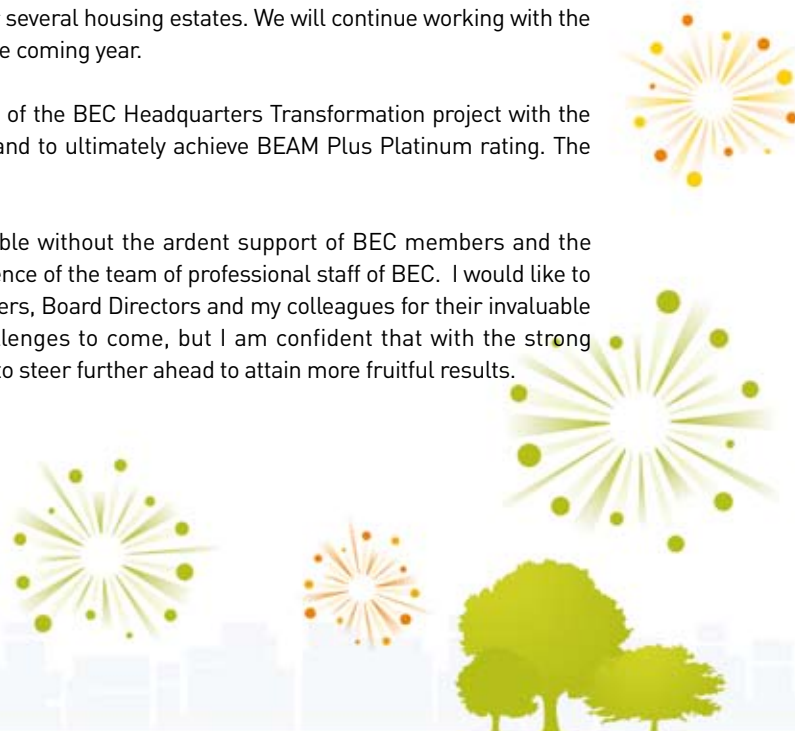

Our long-established professional expertise on building energy efficiency and indoor environmental quality continues to contribute to the promotion and enhancement of building environment. In the last 12 months, our teams have assessed indoor air quality for about 750,000 sq m, and provided advice to companies on BEAM Plus projects for nearly 1.5 million sq m gross floor area.

Our involvement in environmental programmes for the community during the year has been equally rewarding. The "BEC Low-carbon School" programme outreached over 6,000 secondary school students in environmental educational activities by means of school talks, company visits, exhibition tours and a dialogue with the Secretary for the Environment. We will work on similar programmes in the coming year. We have been one of the partners for Housing Authority's "Green Delight in Estates" programme since June 2012 and have organised various educational and promotional environmental events for several housing estates. We will continue working with the Housing Authority in this meaningful programme in the coming year.

Furthermore, we have started preparation of Phase 1 of the BEC Headquarters Transformation project with the aim to improve the energy efficiency of the building and to ultimately achieve BEAM Plus Platinum rating. The implementation work will soon start.

The above achievements would not have been possible without the ardent support of BEC members and the Board of Directors, as well as the dedication and diligence of the team of professional staff of BEC. I would like to take this opportunity to gratefully thank all our members, Board Directors and my colleagues for their invaluable contributions. Looking ahead, there are more challenges to come, but I am confident that with the strong membership base and devoted staff, BEC will be able to steer further ahead to attain more fruitful results.

Agnes Li
Chief Executive Officer

JEC

Together we engineer a better Asia

Jardine Engineering Corporation (JEC) is a leading provider of products and services that enhance Asia's built environment. The group provides sourcing, engineering contracting, and technical services for buildings, the energy and transport sectors, and environmental infrastructure.

Established in Shanghai in 1923, JEC is now headquartered in Hong Kong and operates throughout Asia. JEC is a member of the Jardine Matheson Group.

Energy and sustainability consultation

Our experts develop your blueprint for energy savings

Energy monitoring

Gain visibility to analysis of your facility's energy performance — even when you're off-site

Energy savings projects

Realize energy savings and reduce utility bills by up to 30%

Your building's energy: See it, manage it, and save it with our life cycle services

Why spend tomorrow what you can save today?

How much did you spend on your building's energy today?

As regulations tighten and rates rise, businesses are learning that wasted energy is wasted money. Fortunately, the right partner will show you how much energy your building consumes, and more important, where energy — and money — can be saved.

Our energy services deliver immediate value to your business

Efficiency improvements reduce the total cost of energy per square foot over the life cycle of your facility. And only we provide scalable EcoStruxure Active Energy Management™ architecture and much more that can deliver energy savings of up to 30%, starting today.

30% energy savings is just the beginning

As The Global Specialist in Energy Management™, we are the only provider of comprehensive services and open system architecture that guarantee compatibility among the energy management domains of Power, IT Room, Process & Machine, Building, and Security, allowing businesses to scale up the savings and efficiency from the building to the enterprise level.

It is no wonder that about 75 per cent of *Fortune* 500 companies choose Schneider Electric™ to meet their energy needs. With a savings opportunity like this, future-ready companies know that efficiency initiatives they couldn't afford to implement in the past are projects they can't afford to put off another day.

Schneider Electric is your ideal energy manager, energy expert, and green partner with specialized services for these facilities and more:

Healthcare

Provide superior patient care while controlling costs, eliminating waste, and doing more with less.

Hotels

Maximize guest delight while reducing OpEx, improving your carbon footprint, and offering a safe hotel stay.

Retail

Reduce costs and keep customers safe and comfortable while complying with environmental efforts.

Office buildings

Provide a flexible and productive atmosphere while retaining long-term income and asset value under tightening environmental regulations.

Education

Make buildings and campuses safe and efficient while providing a greener, more productive learning environment.

Download this **FREE** white paper today for insight on improving building performance!

BEC Major Events 2012-2013

Eco-Expo Asia 2012

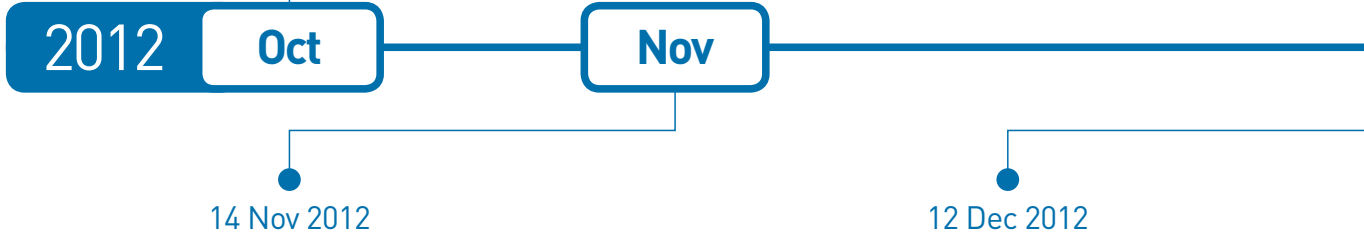

To support the promotion of environmental excellence in Hong Kong and the development of environmental-related businesses, BEC served as the Task Force Member and an exhibitor of Eco-Expo Asia 2012.

27 – 30 Oct 2012

BEC Low-carbon School Programme 2012-2013

This year-long education programme, targets local secondary school students, contains 4 major elements: Dialogue with the Secretary for the Environment held on 28 Oct 2012, guided tour to Eco-Expo Asia, in-school talks, and company visits.

BEC EnviroSeries Conference on “Mastering Hong Kong’s Sustainability Challenges & Opportunities”

The Conference shared the latest information and trends of developing a low-carbon economy with focus on building, energy and transport, which are the major carbon intensive industries in a city.

Seasonal Cocktail

Around 150 members and guests, together with BEC Board Directors, enjoyed food and wine to celebrate the festive season.

BEC Seminar on “Enhancing Corporate Disclosure in Water Risk”

Sponsored by Norges Bank Investment Management, the seminar presented a rare opportunity for discussion of issues related to water risk management and corporate disclosure among invited senior executives.

23 Jan 2013

Breakfast Meeting with Under Secretary for the Environment

BEC invited Ms Christine Loh, Under Secretary for the Environment of HKSAR, to elaborate the environmental measures announced in the Chief Executive’s 2013 Policy Address, and exchanged ideas and opinions with over 120 members and guests.

29 Jan 2013

19 Dec 2012

Visit by the Netherlands Consulate General in Hong Kong

Consul General of the Netherlands met with BEC Chairman and Board representatives to exchange on the environmental challenges and opportunities in Hong Kong.

Formation of BEC Advisory Groups

Four Advisory Groups have been formed this year to more structurally address major environmental issues of Hong Kong and contribute to the improvement in environmental performance of businesses. They are: ESG Advisory Group, Waste Management Advisory Group, Energy Advisory Group, and Climate Change Business Forum Advisory Group.

Visit by C40 Cities Climate Leadership Group

BEC shared its efforts and achievements on the environmental aspect with the directors of C40 Cities Climate Leadership Group, the international network of megacities where the Chief Executive of the HKSAR Government is a member of its steering committee.

23 Apr 2013

Construction and Demolition Waste Joint Working Group

BEC and Hong Kong Green Building Council formed the Construction and Demolition (C&D) Waste Joint Working Group to gather views from industry stakeholders and draw consensus for the targets and recommendations on the reduction of C&D waste.

14 Mar 2013

BEC Leadership Networking Series

The first Chinese dinner was organised under BEC Leadership Networking Series, a regular networking event with a sharing session for members and guests to exchange thoughts on sustainability issues in an opened and relaxing atmosphere.

The Heat is On: Investing in an Age of Climate Volatility Workshop

BEC supported the Environment Bureau and the Environmental Protection Department in organising a workshop on climate adaptation for the financial services sector.

2013 Hong Kong Awards for Environmental Excellence

For the consecutive sixth year, BEC co-organised the Hong Kong Awards for Environmental Excellence to encourage businesses and organisations to adopt green management and innovations, and provide them with an opportunity to benchmark their commitment towards environmental excellence.

2 May 2013

HSBC Living Business Awards 2013

Since the inception of the HSBC Living Business Awards in 2005, BEC has been engaged as its partner to ultimately help small and medium-sized enterprises incorporate socially and environmentally sustainable practices into their business operations.

2 May 2013

May

24 May 2013

BEC EnviroSeries Conference on "Rising to Hong Kong's Waste Challenge: Policies, Best Practices & Opportunities"

Distinguished local and overseas speakers shared their experiences and views on waste management issues with over 150 government officials, business leaders, environmental experts and academics. Success stories of nearby cities – Singapore and Taiwan, were also shared.

27 May 2013

BEC Luncheon Talk on GRI

Four days after the release of the latest Global Reporting Initiative's (GRI) G4 guidelines, BEC invited a certified GRI trainer to deliver a luncheon talk to organisations reporting according to the GRI guidelines to have a better understanding of the latest requirements.

Visit by Macao Chamber of Commerce Youth Committee

Delegates of Macao Chamber of Commerce Youth Committee met with BEC experts to gain a better understanding of the latest trends on green development and measures in Hong Kong.

14 Jun 2013

Jun

18 Jun 2013

BEC Roundtable on "Sustainable City - Planning & Actions"

Sponsored by Siemens, the roundtable attracted around 70 executives from business and public sectors to explore challenges and directions in developing a green, efficient and sustainable city.

20 Jun 2013

Briefing on Hong Kong's Waste Management Strategy and Action Plan

BEC invited the Deputy Director of Environmental Protection to elaborate the "Hong Kong Blueprint for Sustainable Use of Resources 2013-2022", and discuss the waste issues in Hong Kong with BEC members.

BEC Anniversary Dinner 2013

A signature event for members, partners, and government officials to review the development of BEC's key initiatives, to preview the opportunities ahead, and to network with like-minded leaders in shaping the sustainability pathway in Hong Kong.

Clean Energy To Provide a Green and Sustainable Future For Generations to Come

At Towngas, our aim is to be Asia's leading energy supplier and service provider, with an environmentally friendly focus.

As Hong Kong's oldest energy utility, our pioneering green initiatives date as far back as the early 70s, when we began using naphtha rather than heavy oil and coal to produce town gas. This move has reduced the emission of sulphur dioxide over the years, contributing to the prevention of acid rain. In 2006, we took another significant step forward, when we introduced natural gas as a feedstock in addition to naphtha. Together with the use of landfill gas for gas production purposes, we have been able to lower emissions of carbon dioxide even further to the impressive level of 20%. Looking forward, we are committed to the ongoing exploration and supply of clean energy to ensure a green and sustainable future for our young people and the generations to come.

Greening up your life

Building a Greener Hong Kong

For more than a century, HK Electric has been the power behind Hong Kong. Apart from supplying safe and reliable electricity, we are committed to protecting our environment by minimising the impacts of our operations.

To produce greener energy, we have installed emission reduction facilities for our coal-fired units and have increased the use of natural gas in our Lamma Power Station. We have also pioneered in harnessing renewable energy, including building and operating Hong Kong's first and only wind power station as well as the city's largest solar power system.

On environmental education, HK Electric is keen to promote the smart use of electricity and renewable energy through our Smart Power Campaign and Clean Energy Fund. Through sponsorships and joint programmes, we and our volunteers support and take part in numerous environmental initiatives.

Together with all in Hong Kong, we will continue to build a cleaner city and a greener Hong Kong.

Sustainability Benefits Both the Company and the Community

The Link believes that sustainability is mutually beneficial to the community as well as business growth. Therefore, The Link is dedicated to promoting and implementing sustainability in every aspect of its operations in an effort to develop strong relationships with stakeholders as well as enrich and support the local community.

As a responsible and professional company, The Link has developed a comprehensive Sustainability Framework, which establishes financial and non-financial indicators that allow for regular evaluations on performance.

FTSE4Good

The First Hong Kong-Listed REIT to be Included in the FTSE4Good Index Series

In 2013, The Link was included in the highly regarded FTSE4Good Index Series, confirming The Link's compliance with internationally recognised social responsibility standards. The Link is not only the first Hong Kong-listed REIT to receive this recognition, but it is also the first Hong Kong-based corporation to be included since 2009.

Key Indicators and Performance of Sustainability in 2012/13

Community

Barrier free access (BFA) facilities

31% of properties with BFA facilities, indicating a year-on-year increase of 23.2 percentage points

Environment

CO₂ equivalent emission

Achieved 17% cumulative reduction of CO₂ equivalent emission, being an increase of 5.3 percentage points over last year

Tenants

Enhance engagement with tenants

Retention rate rose to 82.7% and occupancy rate to 94.1%

Asset Enhancement

Increase property values

30 asset enhancement projects have been completed

Non-Financial Indicators

Financial Indicators

Total upgrading costs of HK\$41.5 million, 2 times more than last year

Annual electricity cost savings of HK\$16.58 million

Tenant gross sales increased by 9.6%

The valuation of retail properties increased to HK\$80,090 million

安利 為您生活添色彩

本著「為您生活添色彩」的企業理念，安利期望透過優質的產品與服務、公益慈善及環境保育等活動，回饋社會，為每個人生活增添色彩。

早於2003年，安利成立「愛心手牽手」關愛兒童行動的計劃。截至2012年，計劃為全球各地有需要的兒童共籌得1.9億美元，為超過1,000萬名兒童的生命燃點希望。

秉承安利的關愛精神，安利(香港)近年推行了「Amway18區校園有機小農夫」、「安利童心悅學-才藝展現」成長計劃、「萬家燈火齊減碳」、「安利關懷社區行動」及「安利暑期實習生計劃」等項目，回饋本地社群。

SHKP Hong Yip Eco-friendly on all fronts

◀ Mr. Alkin Kwong, Vice Chairman and Chief Executive, pledges Hong Yip's commitment to green management.

Established in 1967, Hong Yip Service Company Limited (Hong Yip) is a wholly owned subsidiary of Sun Hung Kai Properties Ltd and has long experience in the areas of property and facility management. Today, Hong Yip and its associates Grandeur Property Management Company Limited, Royal Elite Service Co Ltd, and Maison Platinum Services Limited manage a number of SHKP landmark properties such as Valais, Imperial Cullinan, The Latitude, Peak One, Manhattan Hill, Noble Hill and many more.

Concrete measures for a better environment

"Here at Hong Yip, we are dedicated to protecting the environment and doing our part to nurture a more eco-friendly Hong Kong," explains Mr. Alkin Kwong, Vice Chairman and Chief Executive of Hong Yip. Hong Yip is fully aware that quality management services can enhance a property's value. With this in mind, we continually strive to elevate the environmental quality of our management portfolio, such as by organising renovation works, promoting recycling for environmental protection, and engaging in landscaping activities that improve the surrounding environment.

Energy savings and waste disposal in focus

When it comes to saving energy, Hong Yip proactively encourages all owners' corporations to make worthwhile investments in such programs as replacing old lighting systems with T5 fluorescent lamps, applying time controls on lifts during non-peak hours, and installing automatic timers for air-conditioning systems.

Waste disposal, too, is now a hot topic in Hong Kong as the issue is rapidly nearing crisis proportions. Hong Yip has taken a number of important steps with regard to the government's Source Separation of Waste Scheme, whereby facilities are made available on each floor of some buildings for occupants to separate their waste and facilitate recycling. In recognition of the importance of proper recycling of food waste, Hong Yip as an industry pioneer has implemented a food waste recycling program called 'Bokashi' at Noble Hill, which produce fertilisers for use in the estate's landscaping. The scheme has since been extended to households in the estate.

Hong Yip continues to pursue service excellence with a view to creating ideal living environments, and doing its part to achieve a greener, more eco-friendly Hong Kong.

For 50 years, Kum Shing has been providing indispensable quality engineering services to develop Hong Kong into a world class metropolis. Our management and staff have helped the business group to build an excellent brand characterized by reliability and the spirit of pioneering.

In the coming decade, Kum Shing will continue to aspire to play a leading role in the development of the city's critical infrastructure. We will also continue to demonstrate to the business community the high level of professionalism at work within the construction industry.

Scania Euro 6

Scania Hong Kong First Launch Environmental Friendly Euro 6 Commercial Vehicles

Greenest Technology . Setting the Standard Again . Always Ahead

Scania takes pride in its strong in-house tradition in research and development. Over the years, we have pioneered a long line of new technologies, making it easy for our customers to find the right match for every need. A Scania engine has always been characterised by its robustness, fuel economy and high torque-to-power ratio. Another typical Scania feature is utter reliability, the result of extensive laboratory and field testing, where every engine is pushed to its limits – and beyond – before it is released.

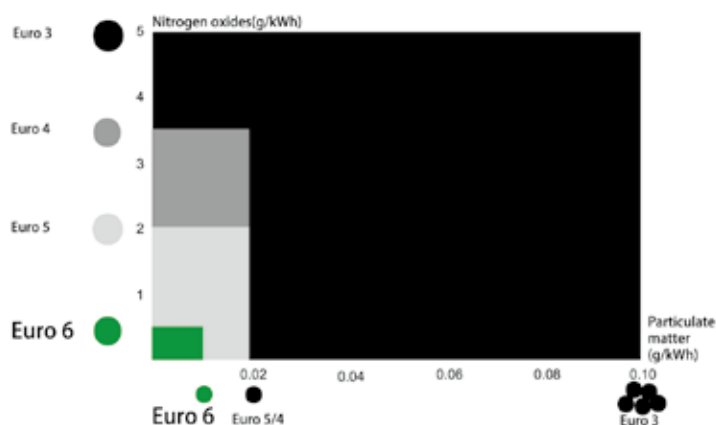

Continuing Proud of Swedish Tradition of Engineering, Craftsmanship and Innovative Technology

Less fuel and more power. The second generation of Scania Euro 6 engines delivers outstanding driveability and operating economy based on refined technology and further enhanced performance. With industry-leading fuel efficiency, with these smaller Scania power houses, which is highly suitable for cost-effective goods distribution and construction applications.

When it comes to exhaust aftertreatment, Scania has extensive experience of working with both EGR and SCR technologies. This is why you find engine options with similar output levels featuring pure EGR, pure SCR and a combination of both in our line-up.

In Euro 6, NOx levels are just a fifth compared to Euro 5. Euro 6 came into force for new models for existing models one year later. In addition to earlier legislation, the Euro 6 directive requires the particles for the first step towards a harmonised world standard.

Emission Comparison between Euro 3 to 6 Engines
